

Yo yo yo!

How's everyone doing this lovely morning?! After another fun week of college football (and more importantly, another week in which A&M is still in the SEC Championship mix), here's where we are in arguably the most important part of the season!

I decided to add that last table to make sure everyone has some added context to the total scores and general movement.

As for **me**, your new (again) overlord, I reeled in the best score of the week (don't check the margin in which I 'won') led mostly by some Friday night tackling by my boy, Carson Schwesinger. He racked up SEVENTEEN tackles in UCLA's loss to Washington. 138 rushing yards from Memphis' Mario Anderson definitely helped as well.

Brian moved up to second place this week despite his tackler, Travion Barnes, not playing (four people picked Barnes this week – does anyone know what happened or why he didn't play?). John Mateer is quietly putting together an incredible statistical season on the Palouse. I didn't play College Fantasy football this year, but I would've FOR SURE picked this guy up off the waiver wire.

Mike G. moved down to bronze for the time being after his worst performance since Week 5. We can blame Travion Barnes for not playing, and UNT's DT Sheffield only recorded 13 receiving yards. Tyler Shough had a solid game for Louisville against Stanford. BTW did y'all see the end of that game? Louisville went for it (around midfield) on 4th and 10 with 10 seconds left because what's the worst that can happen? They run out the clock, right? Wrong! They didn't get the conversion and left a few seconds on the clock. THEN they got an unnecessary roughness penalty to get Stanford in a position to attempt a 57 yard field goal, THEN jumped offsides on that attempt to make it a 52 yard try which they nailed, and won!

Another victim of Travion Barnes, **Sam**, slips to fourth place. Although Tre Stewart had a big time game (136 yards and 2 touchdowns) with -72 points.

Spencer kind of had a mess of picks this week. He submitted them, realized his rushers team wasn't playing, re-submitted them, realized his passer's team wasn't playing, and then re-re-submitted them. Good times. Despite all that, he maintains fifth place behind performances from Carson Schwesinger and Dylan Sampson.

Logan would've had an AMAZING week if Travion Barnes didn't decide to burn everybody, but alas, he has to settle for just a really good week. Shedeur Sanders and Travis Hunter combined for a total of 110 points while Tre Stewart got him his -72. I'd also like to point out how close the top six places are this late in the season. Just 766 points separates first place from sixth place, which is just crazy to me. It's gonna be a wild finish.

Jackson had a really good week trusting USC's new starting quarterback, Jayden Maiava, against Nebraska. A full one point later, it has been determined that was a good decision. Really, the only weak spot this week was Ricky White's (UNLV wide receiver) 264 points.

Hollie had two really good picks and two pretty bad ones; the classic 7-10 split. Devon Dampier lit it up against Washington State (that game was a BANGER), and Quinton Cooley straight dominated UMass

(147 yards and 3 touchdowns – who does he think he is, Ashton Jeanty?). However, the other side of this split is Whit Weeks basically no showed against Florida.

We had our very first Marcel Reed pick this week! **Chapa** took the leap and it was a great idea. 268 passing yards and 3 total touchdowns is no joke. But on the other end of the good-bad idea spectrum, he also picked Tez Johnson. Why's this bad, you ask? Well not only did he pick Tez Johnson just last week, Tez Johnson is currently injured. Double Whammy!

Dario, similar to Chapa, let's check out the injury reports because your tackler, Dylan Rosiek, is actually out for the season. Despite this, though, you still climbed two spots. Kudos to that.

Marc managed to stay static in the rankings despite a few rough picks. Stacking an Oregon QB and WR in a game in which they scored 16 points is really unfortunate, and Jaylen Reed doing diddly as a tackler for Penn State is pretty rough. LaNorris Sellers as a rusher was an awesome pick, though.

I'm skipping to **Moni** here because at least she submitted picks despite having work. She actually submitted her picks multiple ways. No excuses for the rest of you! Oh but you'd already picked Omarion Hampton, so sorry about that.

Grant – I'm disappointed in you.

Mike M. Text me your picks if the Google Form isn't your cup of tea.

I think we lost **Ian** for the year...
